- Should it be necessary at any stage to remove this moulded plug and replace it with a re-wireable BS 13 amp mains plug, the re-wiring should be completed as follows: **(NB: The moulded plug should be disposed of safely)**

Class I (1) Earthed Appliance

The wires in the mains lead are coloured in accordance with the following code:

GREEN & YELLOW = EARTH
BLUE = NEUTRAL BROWN = LIVE

- The wire which is coloured GREEN & YELLOW must be connected to the terminal in the plug which is marked with the letter E or \perp .
- The wire which is coloured BLUE must be connected to the terminal which is marked with the letter N.
- The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L.

With this appliance, if a 13 amp plug is used, a 13 amp fuse should be fitted. If any other type of plug is used, a 10 amp fuse must be fitted at the distribution board.

Instructions for Use

A Selecting and fitting the plates

The Griddle & Grill is a really versatile piece of kitchen equipment. There are many different ways to use the Griddle & Grill, depending on the food you are cooking.

The first thing you need to do before using the Griddle or Grill is to select which side of the plates you wish to cook with. The flat griddle plates are ideal for pancakes and French toast. The ribbed grill plates are ideal for steaks, kebabs and paninis.

You can use both grill plates together, both griddle plates together or a combination of one grill plate and one griddle plate.

To fit the plates:

1. Ensure the product is switched off.
2. Select the plate you intend to cook with.
3. Position the Griddle & Grill so that the controls are facing towards you. Lift the handle to open to grill.
4. Align the two cut outs at the back of the plate (See Fig. 1) with the brackets on the bottom of the housing base (See Fig. 2). Tilt the plate and slide it underneath the bracket. Push down the front end of the plate until it locks into place.
5. Repeat with the second plate.

Fig. 1

Fig. 2

To remove the plates:

1. Ensure the product is switched off and is fully cooled down. Always allow the appliance to cool for at least 30 minutes before removing the plates.
2. Locate the plate release buttons which can be found on the right side of the units upper and lower housing. Press the upper release button firmly, and the upper plate will pop up slightly from the base. Lift the plate up and slide out from under the brackets in the centre. Repeat by pressing the lower release button and releasing the lower plate.
3. The plates can be hand washed or cleaned in the dishwasher after use.

B Selecting the cooking position

Once you have fitted the cooking plates you intend to use, you need to select the cooking position.

Fully open position

The Griddle & Grill can be used in the fully open position to create a double cooking surface.

To adjust the Griddle & Grill to the fully open position, lift the handle using your left hand, then use your right hand to push the hinge lock located on the right side of the product upwards. As you do this, push the handle back, until it is resting on the work surface and the upper and lower plates are level.

Half Open Position

The Griddle & Grill can be used in the half open position. To adjust the appliance to this position, simply lift the handle until it comes into the fully upright position. The unit will stay in this position until you close the cover or continue to open it to the fully open position.

Closed Position

The Griddle & Grill can be used in the closed position as a contact grill/panini press and is ideal for quick cooking as the heat comes from both sides of the plates.

The floating hinge design means that the space between the top and bottom plate adjusts to the thickness of your food. When cooking more than one item at a time, try to ensure the thickness of the food is consistent to ensure even cooking for each piece of food.

To achieve this position simply place food on the bottom plate, place your left hand on the handle, use your right hand to push up the hinge lock with light pressure and push down on the lid until the lid is level with the base unit and is resting on your food. You can apply light pressure using the handle to press whilst cooking to lock in flavour.

C Using the integrated drip tray

The Griddle & Grill has a clever fat drainage system. Fat is drained via a small recess at the rear of the plates, allowing fat and grease to drip down into the integrated tray.

To insert the drip tray, insert it into the slot on the right side of the lower housing, The edge of the drip tray with the curved shape should be inserted first. To remove the drip tray, simply slide the tray out of the slot. Grease should be disposed of safely after cooking. The drip tray can be washed in the dishwasher.

D Cooking with the Griddle & Grill

Once the plates and drip tray are fitted and the cooking position has been selected, you are ready to start cooking with the Griddle & Grill.

1. Ensure the unit is plugged into the mains power supply.
2. If you wish to control the temperature using the low, medium, high or sear settings, as you would when grilling or pressing paninis, select the Grill/Panini setting on the selector dial. The red light will illuminate to indicate that the power is on. You can then select the desired heat level using the Grill/Panini dial.
3. If you would prefer to control the temperature using the temperature settings instead, then select the Griddle setting on the selector dial. The red light will illuminate to indicate that the power is on. You can then select the desired heat level using the Griddle dial.
4. When the Griddle & Grill reaches the correct temperature, the green light inside the chosen control will illuminate to indicate that the appliance is ready to start cooking.
5. The green light will continue to turn on and off as the thermostat monitors the temperature. This is normal.

N.B The first time you use the appliance, it may have a slight odour and may smoke a little. This is normal and common to appliances with a non-stick surface.

When you have finished cooking, turn the selector to the 'Off' position and unplug the power cord from the mains. Allow the appliance to cool for at least 30 minutes before handling.
