- Full bean-to-cup customization

Easy to use

- Immediate beverage selection
- Ergonomic in day-by-day operations

Easy to clean and maintain

- Automatic cleaning and de-scaling
- Frontal access to removable brewing group

PHILIPS

Saeco

sense and simplicity

Highlights

SBS (Saeco Brewing System)

Philips Saeco exclusively allows you to adjust your espresso's intensity, altering the crema and body structure as it is dispensed. Simply by turning the knob you can prepare the crema exactly according to your taste. A little knob that makes a big difference.

Double boiler

Optimal conditions for everything: two independent circuits assure quick and convenient coffee preparation directly after frothing your milk.

Immediate beverage selection

Whether you want a cappuccino or an espresso, with the immediate beverage selection you can enjoy your personally customized beverage specialty at the touch of a button

Autocleaning and de-scaling

Easy to use includes easy maintenance: Thanks to the automatic cleaning and de-scaling cycles, you are guaranteed perfect enjoyment every day and maximum longevity for your machine.

Removable brewing group

The brewing group is at the heart of every fully automatic coffee machine and it should always

be kept clean. A task that doesn't get any more convenient than with a Saeco: remove, rinse and re-insert – finished.

Full customization

Everything just the way you like it: Choose your favorite coffee blend and adjust coffee length, intensity, temperature, crema and body structure until they all meet your personal taste perfectly.

Ergonomic day-by-day

Philips-Saeco is a synonym for convenience: refilling beans or water, emptying the coffee-dump box or the drip tray, all compartments are directly accessible.

Integrated milk function

Integrated automatic milk function with Autoclean
