

Live! Cam Optia Pro (VF0380)

The better choice for online communications.

Creative's Live! Cam Optia Pro is the premium webcam for online video messaging. Its precision wide-angle glass lens easily fits you and your friends in the picture, aided by the high-resolution 1.3 megapixel sensor and Auto tuning technology, which produce crisper, better-looking online images, video clips and stills. The built-in microphone includes noise-cancelling technology so your friends will hear you in the best quality, and the Hi-Speed USB connection eliminates any bottlenecks between the webcam and your computer to ensure smooth video recording. Many other exciting features including multiple video effects, avatar creation and simple video editing tools are included on the Live! Central Premium software supplied.

- True 1.3 megapixel sensor captures more detail for use online, in videos and in stills.
- Wide-angle precision glass lens for top-quality picture composition.
- Built-in noise-cancelling microphone for clearer speech.
- USB Video Class (UVC) compliant for 'Plug & Chat' without any software installation.
- Hi-Speed USB connectivity for smoother video recordings.
- Live! Central Premium software (supplied) adds multiple video and voice effects, noise cancellation, parental control and much more.
